

Growth industries in Central Hesse

Central Hesse's optical, photonic and measurement and control industries comprise numerous state-of-the-art production companies that dispose over a diversified product range. The region is thus a leading centre of one of the most innovative and rapidly growing industry sectors.

Central Hessian universities, meanwhile, enjoy an excellent reputation as premier centres of medial research and application. The fields of biotechnology, medical technology and the pharmaceutical industry profit from the region's innovative competence and dispose over excellent development potential.

Business founders and investors will find a comprehensive network of suitable business partners in Central Hesse to help them realise their ideas and achieve their objectives.
